EXPERIENCE

Game Programmer

[Nov 2023 - Jul 2025](#)

Exit Studio (Independent Team)

- Delivered gameplay, UI, and audio features across multiple **short-format game jams**, adapting quickly to **diverse styles** and **team workflows**.
- Worked in a **collaborative environment**, focusing on **rapid iteration** and **clean implementation** under **tight deadlines**.

Game Programmer

[Aug 2024 - Dec 2024](#)

DodoDodo Games (Independent Team)

- Played a pivotal role in developing and refining **core systems** for a larger team project, ensuring **creative ideas** were technically realized.
- Also served as **lead programmer** across multiple **game jams**, leading the development of **innovate award-recognized** gaming experiences.

Game Developer

[Sep 2023 - Jul 2024](#)

New Horizon Studios (Independent Team)

- Held a key role in developing **essential game mechanics** while ensuring **performance** and **polish** across the entire gameplay experience.
- Contributed as **main artist**, creating several **assets** and **visual elements** to support and elevate game design goals.

PROJECTS

[Boba Tea Time](#)

[Aug 2025 - Sep 2025](#)

"Make Boba Tea for your cute animal consumers"

- Rebuilt the game's codebase**, refactoring core systems to improve **readability, maintainability, and performance**, while redesigning several components from the ground up.
- Identified and resolved bugs**, simplified **deeply nested code structures**, and improved project **stability and documentation** for final presentation and continued development.

[Through Your Eyes](#)

[Aug 2024 - Dec 2024](#)

"Capture the World through a new perspective"

- Built and maintained several release builds**, resolving multiple critical crash issues and ensuring the game shipped **on time and stable**.
- Developed key gameplay systems including the **Gallery, Dialogue, and Quest progression**, enhancing player engagement and narrative flow.
- Selected for **Trojan Horse Unicorn's Talent League 2024**, and showcased at **DevGAMM Lisbon 2024**, implementing **validated playtest feedback** on-site.

[Titan Ascension](#)

[Sep 2023 - Jul 2024](#)

"Rebuild the Robot and revive a damaged world"

- Designed and implemented a **dynamic push/pull system** with variable-sized cubes for Sokoban-inspired puzzles. Developed an **Achievements system** with trackers to reward progression and exploration.
- Created all **game art assets**, including main character, animations, and a **custom shader**, ensuring a cohesive visual style throughout the project.
